

FUND OVERVIEW

EVCM is a focused global value fund. Our goal is to generate the highest possible long-term returns without risking a permanent loss of capital. Employing a disciplined value investing approach, we search the world for the best investment opportunities based on long term business fundamentals. We then construct a long-biased, concentrated portfolio consisting of 20-40 positions, mostly stocks, trading at deep discounts to their intrinsic business values.

Our in-depth research explores the merits of each potential investment in the context of a global market. Many of our investments benefit from multiple economic tail winds as they operate in emerging markets that are experiencing rapid economic growth and development. We use little or no leverage and demand a wide margin of safety for each investment.
